Subject : **Dr. Andrew Marr, Steve Gens, Olivier Gendrin & LSCP to separate for very different reasons**

Uerikon/Zurich, Switzerland, December 3, 2013

The **LSCP Life Sciences Consulting Partners** Management Team would like to thank Dr. Andrew Marr for all he has brought, shared and executed with us in the context of Standards, in particular ISO IDMP to our global network since his adherence almost 3 years ago!

Different views and opinions between **Dr. Andrew Marr** and Ruedi F. Blattmann as Managing Partner and not the **LSCP** group as such were the drivers for the decision for him to pursue his own activities outside the network, more related on the personal level with). The fact, that delays caused by ICH moving responsibilities to ISO for implementation guides were just a supplement.

At the same time Mr. **Steve Gens**, Associate Partner wishes to exit our global network as well, as his business was diverting more and more from the core of **LSCP**. During many years we have assisted Gens & Associates in conducting global surveys around eCTD and RIM. Here we have decided to still cooperate under whatever banner necessary in the future to meet customer needs, should the opportunity arise.

Furthermore, Mr. **Olivier Gendrin**, MBA, SME had the opportunity to assume a management position with a global, well known enterprise with whom he had already a consulting mandate while he was a member of our network. We wish him well and look forward crossing roads again one of these days!

LSCP with its main competencies in the domain of enterprise information governance and compliance management will, in early 2014 be able to communicate its adaption to this situation by enhancing and strengthening the network while moving into its 10th Anniversary of services next year.
